Tabletop & benches

White

Legs & endcaps

White (RAL9016)

Materials	Key facts	Thickness	Layer thickness	Density	In/outdoor	Water	UV colour fastness	Flame retarding
		mm	micron					
Fibre glass tabletop & benches	- Made with pultrusion technique: a non-stop process of fibre glass wires pulled through a bath of polyester - Strong - Lightweight	2,7	n.a.	1,80 10³kg/m³	Outdoor & indoor	n.a.	The white hue can change to some extent when exposed to UV	/
Structured powder-coated electro galvanised steel legs	- Easy to clean - Electro galvanised (for extra protection against rust), then powder-coated - More scratch-resistant than non structured powder-coating	3	100	7,50 10³kg/m³	Outdoor & indoor	n.a.	Very good: the white hue can change to some extent when exposed to UV	NEN-EN13501-1 A1 *
Polyamide feet	- Injection-moulded nylon - Adjustable in height and surface	n.a.	n.a.	1,14 10³kg/m³	Outdoor & indoor	n.a.	Very good	/

* NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Warnings

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colours can differ over years and from batch to batch.

Product

- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.
- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace

is made of.

- We strongly advise you against standing on top of the table! A concentrated load can cause small perceptible cracks in the profiles that might be visually annoying, although they do not affect the strength of the table in any way.
- For table with 3 legs or more, we recommend using trestles to attach the table leg assemblies to the tabletop, instead of keeping it upside down.

Powder-coating

- White powder-coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Colour can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-sl - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly

contribute to the fire load and fire growth.

- Dark colors can get very hot in sunny weather.

Fibre glass

- Stains should be removed immediately with a clean, soft cloth, particularly in case of dark-coloured liquids such as wine, ink, coffee, coke, oil or bird droppings. If left to dry, these liquids may cause permanent damage!
- Avoid using aggressive and abrasive products.
- Clean daily with Extremis Multi Cleaner.
- In case of stubborn stains, we recommend using a magic sponge.
- The white hue can change to some extent when exposed to UV.
- Color variations are possible, and even likely. This is intrinsic to this production technique. It contributes to the natural effect.

Applications

Residential: on terraces, patios, courtyards. Indoor or outdoor, as a dining table, ...

Project: hotel and catering industry, company terraces, public spaces, offices, meeting rooms, bars, ...

Good to know

- 55 cm bench space / person.
- The average transport volume is 0,17m³ / person, which is really low.
- Fibre glass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of pulling fibre glass wires through a bath of polyester resin and letting them harden in a matrix afterwards to get their final shape.
- Main advantages of this material are its strength and low weight.

Awards

Floor fastening

Marina picnic comes with an optional floor fastening set.

Find more instructions in the manual.

F.a.q.

Q: What is the biggest size possible?

A: We have produced a 30m table, the only problem is transport. We can deliver tables up to 7m without extra costs.

Q: What about UV-resistance?

A: By adding special additives, the material of the Marina picnic has a much higher UV-resistance than other white synthetics. We don't have to tell you that that white will not stay brilliantly white.

Q: Are the legs corrosion-resistant?

A: The legs are first galvanised, and powder-coated afterwards. This way, we have a double protection layer.

Maintenance

Find maintenance instructions at the downloads section of extremis.com for:

FIBRE GLASS PROFILES

- Stains should be removed immediately with a clean, soft cloth, particularly in case of dark-coloured liquids such as wine, ink, coffee, coke, oil and bird droppings. If left to dry, these liquids may cause permanent damage!
- Use common kitchen cleaning products. Avoid using aggressive products. These surfaces are best cleaned with a neutral cleaning product diluted in water.
- In case of stubborn stains, we recommend using a magic sponge.

POWDER-COATED PARTS

- White powder-coating requires more maintenance obviously.
- Stains can be cleaned with a magic eraser.
